Bethel African Methodist Episcopal (Bethel) Church has a history within the community for collaboration with other organizations in Kent County.

Bethel has worked aggressively over the last year on identifying the primary minority groups in the Kent County area (Asian American, African American, Women, Native American and Hispanic populations) for program implementation. During this year, Bethel will be hosting activities to educate the targeted groups on cancer prevention and tobacco cessation. Bethel will also host a cultural diversity event that is open to the public.
