BALTIMORE, MD 21297

410-764-4777; 800-492-6836

## VIDEO ORDER FORM

(Each video was produced by the Maryland State Department of Health and Mental Hygiene and the Maryland Board of Physicians, through the facilities of the Maryland Public Television - Special Projects Unit)

' ***CROSSING THE LINE*** (1996) (17:49 min.) **\$35.00**

This first video, produced in 1996, examines boundary violations. The program addresses topics including the balance of power in a physician/patient relationship, the patient who makes unethical requests, as well as appropriate office atmosphere. The purpose of the video is to educate and remind physicians and other health care professionals of boundary issues. This 18-minute, closed caption tape includes vignettes demonstrating the situations which could become potential problems and should stimulate the audience to begin thinking about danger signals.

In addition, MBP Board members address topics including the balance of power in a physician/patient relationship, unethical requests, office atmosphere and others.

' ***PATIENT/PHYSICIAN RELATIONSHIP*** (1997) (18:07min.) **\$35.00**

This video explains the process an individual should follow when selecting a physician, what to expect from a physician in medical treatment, the responsibilities of a patient when visiting a physician and what procedure to follow to file a complaint with MBP if the patient believed that the physician did not provide adequate medical care.

“Crossing the Line” and “The Patient/Physician Relationship” were produced following the Report of the Maryland Task Force to Study Health Professional-Client Sexual Exploitation which recommended education programs for the citizens about the issue.

' ***SENSE OF BALANCE*** (1998) (20:33 min.) **\$35.00**

This is a videotape presentation on drugs, chronic pain, and related subjects including appropriate prescribing of controlled drugs, over prescribing, the addicted physician and identifying the drug seeking patient. This video presents the position of the Maryland Medical Board as well as that of the Federation of State Medical Boards on prescribing to patients with pain. Viewers examine cases brought before the Board which deal with pain related issues to develop an understanding of the Board's position on these issues.

' ***PEER REVIEW: A DOCTOR'S PERSPECTIVE*** (2000) (20:46 min.) **\$35.00**

This video depicts the process of physician peer review for a state medical board. It attempts to answer most commonly asked questions of prospective peer reviewers, and takes the viewer through a typical case from assignment to witness preparation. The video has been used as a training tool in the peer review process in Maryland.
