- Notes**
1. Providers will always have two years for any Stage of Meaningful Use.
 2. Providers will follow the sequence of two years for each Stage, regardless of whether they take a year off from the program.
 3. If a provider takes a year off, they pick up right where they left off. In essence, you just shift the provider's time line to the right.
 4. Providers will always have 90 days of Stage 1 in their first year of MU.

*For 2014 only, providers will have 90 days of Meaningful Use, regardless of Stage.

AIU - Attesting to adopting, implementing, or upgrading certified EHR technology; no meaningful use reporting required.

90 - You must attest to meeting 90 consecutive days of meaningful use in the program year in which you are participating.

365 - You must attest to meeting 365 consecutive days of meaningful use in the year in the program year in which you are participating.

This means that you will actually be attesting AFTER you have completed a year's worth of Meaningful Use.

EPs can only participate for 6 years.
