

**Patient Information**

Patient Name: \_\_\_\_\_ MA ID#: \_\_\_\_\_ Date of Birth: \_\_\_\_\_

Gestational age (weeks & days): \_\_\_\_\_ Weight at birth: \_\_\_\_\_ Current Weight: \_\_\_\_\_ Date measured: \_\_\_\_\_

**Prescriber Information**

Name: \_\_\_\_\_ NPI#: \_\_\_\_\_ Specialty: \_\_\_\_\_

Contact Person: \_\_\_\_\_ Telephone: \_\_\_\_\_ Fax: \_\_\_\_\_

**Prescription Information**

Dose: \_\_\_\_\_ Number of doses: \_\_\_\_\_ (max 5 doses) Request for  1st RSV season  2nd season

Previously administered doses (if any) and dates of service: \_\_\_\_\_

**For refills:** Please fax patient's most current body weight with a history of three prior dated weights along with this form.

Did the patient receive Beyfortus during this RSV season?  Yes; Date received: \_\_\_\_\_  No

**Patient must meet ONE of the following criteria based on 2014 American Academy of Pediatrics:**

- Infant <12 m/o born <29 weeks gestation without chronic lung disease (CLD) or congenital heart disease (CHD).
- Infant <12 m/o born <32 weeks gestation with CLD of prematurity who received >21% oxygen for at least first 28 day of birth
- Infant <12 m/o born with hemodynamically significant congenital heart disease (CHD) characterized by (check all that apply):
  - Acyanotic heart disease (HD)  Cyanotic HD  Requires cardiac surgical procedure  On medications to control heart failure. Medications: \_\_\_\_\_
  - Moderate to severe pulmonary hypertension
  - Under a pediatric cardiologist consult
  - Other \_\_\_\_\_
- Infant <12 m/o born with neuromuscular disease or congenital heart anomaly that impairs the ability to clear secretions from the upper airway.
- Infant <12 m/o with Cystic Fibrosis and clinical evidence of CLD or nutritional compromise.
- Infant <2 y/o with CLD of prematurity and for the previous 6 months continues to require medical support with:
  - Chronic corticosteroid therapy  Diuretic therapy  Supplemental oxygen
- Infant <2 y/o with Cystic Fibrosis that previously received Synagis therapy for an RSV season and one of the following:
  - Previous hospitalization for pulmonary exacerbation in the first year of life.
  - Chest computed tomography that persists when stable or abnormalities on chest radiography.
  - Weight for length is less than the 10<sup>th</sup> percentile based on WHO growth chart.
- Infants < 2 y/o who are profoundly immunocompromised.
- Infants < 2 y/o who had a cardiac transplant during RSV season.
- Infants < 2 y/o who continue to require prophylaxis after cardiopulmonary bypass or following the conclusion of extracorporeal membrane.
- Oxygenation requiring a post-op dose as soon as the infant is medically stable. Date of Service: \_\_\_\_\_
- Other: \_\_\_\_\_

Please attach  most recent progress notes and  NICU discharge summary along with this form.

*If a patient has certain health conditions, for which prophylaxis may not be medically necessary, OPS Clinical Pharmacists will review this prior authorization request on a case-by-case basis.*
